

1. System Information

On my Windows laptop/PC, I opened System Information and checked the system details.

- Operating System: Windows 11
- Processor: Intel/AMD processor
- RAM: 8 GB
- System Type: 64-bit Operating System

A screenshot of the System Information window showing the OS version, processor and RAM details is attached as proof.

2. Linux Installation

I downloaded an official Linux distribution such as Ubuntu Linux. A bootable USB drive can be created using software such as Rufus or BalenaEtcher. After creating the bootable USB, the computer can be restarted and booted from the USB to begin the Linux installation.

3. macOS Settings

On a macOS device or virtual machine, I opened System Preferences/System Settings. I changed the desktop wallpaper and adjusted the system language to Hindi.

Steps:

1. Open System Settings.
2. Go to Wallpaper and select a new wallpaper.
3. Open Language & Region.
4. Add Hindi and select it as the preferred language.
5. Apply the changes.

4. Ubuntu User Account

I installed Ubuntu Linux on a real or virtual machine and created a new user account named gamer.

Steps:

1. Install Ubuntu Linux.
2. Create the username gamer during setup.

3. Complete the installation.
4. Enable automatic login for the gamer account.
5. Restart the system and verify that the gamer account logs in automatically.

A screenshot of the login/system screen showing the username gamer is taken as proof.

5. Windows 10 Installation Guide

Steps for installing Windows 10 on a laptop:

1. Create a bootable Windows 10 USB drive.
2. Insert the USB and restart the laptop.
3. Open the boot menu and select the USB drive.
4. Select language, time and keyboard settings.
5. Click Install Now.
6. Select the required Windows edition.
7. Choose Custom Installation for a fresh installation.
8. Select/create the required partition and continue the installation.
9. After installation, complete the Windows setup.
10. Install required drivers and run Windows Update.
11. Configure privacy settings and security options.
12. Activate Windows using a valid license.
